

**State Agencies' Action Plan Status Report
for Fiscal Year 2000**

Action ID	Action Item Title	Lead Agency	FTE	Biennial Total	Tasks Planned for Fiscal Year 2000	Status
ADAPTIVE MANAGEMENT AND MONITORING - RESEARCH ACTIVITIES						
Res-1	Continue fish ecology research	WDFW, Tribes	55.1	3,710,000	Continue fish ecology research.	58 research projects were conducted, including field work evaluating the effects of warmwater fish predation on salmon. Conducted analyses assessing the effects of food availability and competition on the success of supplementation of wild fish with artificial production. Determined from DNA microsatellite analysis that stocking of hatchery origin fish had no genetic impact on most of the eight populations of cutthroat in the Pend Oreille drainage. Identified shorelines as a key habitat feature for chinook salmon in Lake Washington.
					Provide annual reports of accomplishments to the funding agents.	Three peer-reviewed publications; 22 reports to federal, state, local, tribal, international, and private organizations.
Res-2	Study predation on Salmon	WDFW	2.9	310,000	Participate in caspian tern working group development of Year 2000 Action Plan.	Ongoing. On track.
					Identify potential nesting and roosting sites in southwest Washington, south Puget Sound, and north Puget Sound.	Project underway. On track.
Subtotal			58	4,020,000
